

My Weight Loss Story

Weight Lost: 60 pounds

Before

After

“In 2019, my life changed forever with a cancer diagnosis. I knew that I needed to change my lifestyle for the future of my twins. After my emergency hysterectomy, things like weight loss became harder every year since surgery. No matter how much time I spent in the gym, the weight was very hard to come off. Then I found Dr. Finley, Amanda, and their office. They have an amazing staff who helped me step by step and supported me in reaching my goals with a surgical option. My surgery was in October, and I have lost 60 lb so far. I feel more motivated and more confident every day. Some days are harder than others, but I know I made the right choice”
